📍 Nairobi, Kenya

EDUCATION

Study Program

Edulink International College, Kenya

09/2021 - Present

Nairobi, Kenya

Courses

- Software Engineering - Advanced Diploma in Software Engineering.
- Digital Marketing - Certificate [May, 2021]

Key Responsibilities and Achievements:

Software Development: Collaborate with the development team to design, code, test, and debug software applications or components. Assist in implementing new features and improvements to existing systems.

Code Review: Participate in code reviews to provide constructive feedback and ensure adherence to coding standards, best practices, and design principles.

Bug Fixing and Troubleshooting: Assist in identifying and resolving software defects or issues reported by users or discovered during testing.

Documentation: Contribute to creating and maintaining technical documentation, including specifications, user guides, and project documentation.

Version Control: Utilize version control systems (e.g., Git) to manage codebase changes and collaborate effectively with team members.

Testing and Quality Assurance: Conduct testing activities, such as unit testing, integration testing, and regression testing, to ensure software functionality and reliability.

Learning and Skill Development: Actively learn new programming languages, tools, and technologies relevant to the company's projects and the software development industry.

Project Support: Assist in project planning, estimation, and task management under the guidance of senior developers and project managers.

Research and Innovation: Explore and propose innovative solutions or technologies that could enhance product performance, user experience, or development processes.

SKILLS

Programming Languages: Java, Python, C++, C#, HTML, JavaScript, CSS

Databases: MySQL

Operating Systems: Linux (Basic), Android Studio

Software application development, android application development, web development and basic Knowledge of Data Structures and Algorithms

PERSONAL PROJECTS

Android APP for Rolex Watches (10/2022 - 11/2022)

- The Rolex app is one place to get all information regarding Rolex Watches. Inside app will have the information of various categories and models of Watches offered by Rolex. It will consist various categories, like Analog Watches, Digital Watches, Men's Watches, Women's Watches, and Couple Watches etc. Accordingly the products will be listed in the categories.

Online Jewellery Shopping website (06/2023 - 07/2023)

- I developed a complete web-based solution for Jewellery shopping website. The motive of this Online Jewellery Shopping Web Application is to allow the user to play with the search tool and create different combinatorial search criterion to perform exhaustive search. Provided Interactive interface through which a user can interact with different areas of application easily.
